OBAMA'S TIMELY SECRET IS OUT...

As the world's most powerful man, US President Barack Obama would, you'd think, sport a serious piece of wristwatch bling. Rolex? Breitling? Longines?

How about a relatively anonymous Japanese quartz movement chronograph? Yep, since taking office in January Mr Obama has stuck with a Jorg Gray 6500 Series Chrono, given to him by Secret Service agents on his 47th birthday in 2007.

Jorg Gray has been quick to lap up the marketing spin-offs of Mr Obama's election, releasing the 41mm-dial watch in a commemorative numbered edition with the inscription *The 44th President of the United States Barack H. Obama* engraved on the back. It's yours for around \$325. But Mr Obama's exact model, complete with Secret Service logo, is still in the very-very-hard-to-get category. Jorg Grays sporting this logo can only be sold through the Secret Service Employees Shop (!) to bona fide Secret Service workers. Shop profits go to charity.

If you want the Obama 6500 commemorative model, check out jorggray.com. The Jorg Gray line-up will be introduced to WA retail stores soon.
